A current focus of Eastern Plains RC&D Council is Irrigation Efficiency and Water Conservation on the Yellowstone and Missouri Rivers

Eastern Plains RC&D Council envisions viable self-reliant communities and businesses supported by a sustainable and diversified economic base

Mon-Dak Ag Open 2010

Eastern Plains RC&D and its partners again cooperated with northwestern North Dakota economic development organizations to produce the 13th Mon-Dak Ag Open to promote the economic well-being and resource development of the region. Eastern Plains RC&D helped organize this event for eastern Montana and we had 12 co-sponsors from this region. Economic development organizations in Richland County organized a tour of natural resource businesses of the Sidney area. The event attracts potential agricultural product processors to this region each year.

A barrier fence installed to deter vehicle use

Fairview Tunnel Erosion Restoration

The Fairview Bridge/Cartwright Tunnel erosion restoration was initiated in cooperation with Friends of the Fairview Bridge, McKenzie County (ND) and Williston Basin RC&D. Work has ended for the season. Some minor dirt work was completed by McKenzie County road crew to restore land contour following water erosion. The weedy area has been chem-fallowed this summer and a fall dormant seeding has been completed. A native seed mix suggested by the plant materials center was used.
