Tree Planting/Forestry Projects

Green Arrows above indicate where trees were planted

City of Parker Athletic Field Tree Planting – the Parker Athletic field project was installed with financial assistance from a SD Department of Agriculture, Division of Forestry Grant. The project included the planting of 38 trees of 8 varieties for a total project cost of \$3,711. Community members identified this tree planting as an important need for the existing as well as for the recent athletic field complex expansion to provide shade, wind protection and to improve the overall beauty for their community athletic complex gathering area.

Salem Urban & Community Forestry project – was completed with assistance from a SD Department of Agriculture, Division of Forestry Grant. The project included the removal of two aged trees located on the boulevard adjacent to city hall, and the installation of one “Crimson Cloud” Hawthorne & one “Fairview” Norway Maple as their replacements. In the Salem City Park, two “Accolade” Elm & two “Fairview” Norway Maple (pictured below) were planted to improve the recreational and aesthetic resources of the community park.
